### **BANNER AMERICAN'S NEW MIGHTYLAM 2700™; DELIVERS 27" WIDE LAMINATING CAPACITY**

#### **New MightyLam 2700™ Laminator Provides Commercial Laminators An Immediate Advantage Over Competing 25" Laminators**

(Temecula, CA)... Banner American Products, Inc. is proud to announce the introduction and immediate availability of the MightyLam 2700™ Laminator. The new MightyLam 2700™ gives an immediate, competitive advantage over conventional 25" width laminators. It is capable of laminating from .0015" to .010" gauge film and mounts materials up to 3/16" thick. Designed for commercial print shops, copy shops, service centers, sign shops, and in-house graphics departments, the MightyLam 2700™ is the ultimate production solution.

Banner American Products has engineered the new MightyLam 2700™ to be a solid workhorse, high on productivity, low on cost. Its simplified, easy-to-set heat controls and variable speed control provide consistent, quality lamination of up to 10 feet per minute.

The MightyLam 2700™ has several standard features including an attached safety shield, drop-down bottom idler for easy loading, teflon coated heat shoes, silicone laminating rollers, reverse switch, adjustable slitters and heavy-duty DC motor. Additional features include forced air cooling, built-in LCD readout, and adjustable roll tension. Optional features, such as a footage counter for measuring laminating film usage, safety keyswitch for preventing unauthorized use, and a handy footswitch enabling exact positioning of items prior to laminating, are available.

The MightyLam 2700™ is another high-end manufactured product of Banner American Products, Inc. It is designed to provide solid durability and performance dependability. For more information about the MightyLam 2700™ contact: Alan Parkhill, Banner American Products, Inc. at (800) 572-2144 or e-mail: [marketing@banam.com](mailto:marketing@banam.com).
