**BANNER AMERICAN PRODUCTS INTRODUCES DEEP QUARTZ™; THERMAL LAMINATING FILM**

**Banner American's New Laminating Film Has The Look Of Textured Polycarbonate**

(Temecula, CA)... Banner American Products, Inc. proudly introduces Deep Quartz™; thermal laminating film. The new 7.0 mil non-glare laminating film produces a rich luster look so important for tradeshow graphics, counter mats, mouse pads, placemats, and other promotional graphics. Deep Quartz™; is an optically flat thermal laminating film that bonds with most available printed medias including wide format ink jet outputs. Available in 38" and 51" widths, Deep Quartz™; runs at low processing temperatures on heated roller laminators.

Deep Quartz™; thermal laminating film is especially suited for creative designers, ad agencies, printers and service bureaus, and can be used for single side and two sided laminating applications. It handles well and rolls without curling and will not readily show scratches and abrasions.

For more information about Deep Quartz™; thermal laminating film contact: Alan Parkhill, Banner American Products, Inc. at (951) 296-9780 or view the company's website at [www.banam.com](http://www.banam.com).
