BANNER AMERICAN PRODUCTS INTRODUCES NEW VALUELAM 4500 LAMINATING/MOUNTING MACHINE

New ValueLam 4500 Laminating/Mounting Machine Operates on 120 volt.

(Temecula, California) ... Banner American Products, Inc. is proud to introduce its new ValueLam 4500 Laminating/Mounting machine. The introduction of this value priced laminator provides large-format imaging services the capability of mounting, laminating and encapsulating output from 36", 42" and 44" inkjet printers. Affordable and functional, the ValueLam 4500 is loaded with features important in producing the highest level of results for each and every project. The ValueLam 4500 laminating/mounting machine offers carefully designed features intended to facilitate a profitable finishing service without the added expense of more advanced machines. The easy-to-use design makes the operator's job simpler with features such as: top and bottom heat, electronic heat control with LCD readout, variable speed, forward/reverse switch, 3" (7.62cm) diameter silicone heated rollers, clear polycarbonate safety shield, emergency stops on both sides of machine, and mounting capability up to 1/4" (6.4mm).

According to Alan Parkhill, Banner American Products, Inc., "In addition to the ValueLam 4500's extremely competitive price, the laminator will operate on a 120 volt electrical circuit. This can save an additional \$500-\$1500 in setting up a dedicated 220 volt line."

For more information on the ValueLam 4500 Laminating/Mounting machine and or other fine Banner American Products, Inc. call 800-572-2144.
