### **BANNER AMERICAN PRODUCTS INTRODUCES ITS ALL NEW EASY LAM II LAMINATOR**

Designed Expressly With the "Teacher in Mind", Easy-Lam II is Engineered To Be School Safe and User Friendly.

(Temecula, CA... May 23, 2000) ... Banner American Products, Inc. proudly introduces the Easy-Lam II laminator. The Easy-Lam II is specifically designed for teachers in busy school environments. The new Easy-Lam II's ease of use, solid workmanship and dependability is the perfect solution for any school laminating project, such as posters, flash cards, teaching aids and more - large or small. Featuring a sleek modern design, improved safety and processing performance, the Easy-Lam II provides simplified control and expanded capability. Its easy-to-set heat control system and a wide 27" film capacity allow the user to laminate a variety of materials with two additional inches of capacity than conventional 25" machines. The Easy-Lam II can laminate either .0015" or .003" gauge film at a speed of five feet per minute.

The Easy-Lam II features a specially designed see-through safety shield, which provides visual inspection of the laminating process. Banner also offers an optional key-switch used in deterring unauthorized machine use, and an easy to reach optional control foot-switch, that allows the operator to better position items before the laminator is started.

The Easy-Lam II is host to a new, revolutionary cost-saving design, utilizing molded-side housings to structurally support the rollers, heaters, mandrels, and other components. This innovation has lead to several new and important features being added to the machine without increasing costs: most notable, a new heavy-duty DC motor enhancing the overall performance and strength of the machine over a longer period of time and use. Others include silicone-laminating rollers, tension adjustment knob on top and bottom mandrels, drop-down bottom idler for easy loading, reverse switch, and built-in thermometer.

For more information on the Easy-Lam II or Banner American's complete line of home and office laminator products, contact: Alan Parkhill, Vice President, Sales and marketing, Banner American Products, Inc. at (951) 296-9780 or email [alan@banam.com](mailto:alan@banam.com).
